### **Aircraft Spruce from Aircraft Spruce**

An aircraft is a machine that is able to fly by gaining support from the air. It counters the force of gravity by using either static lift or by using the dynamic lift of an airfoil, or in a few cases the downward thrust from jet engines. Common examples of aircraft include airplanes, helicopters, airships (including blimps), gliders, and hot air balloons. ...

Aircraft manufacturing is an important industrial sector in Russia, employing around 355,300 people. The dissolution of the Soviet Union led to a deep crisis for the industry, especially for the civilian aircraft segment. The situation started improving during the middle of the first decade of the 2000s due to growth in air transportation and increasing demand.
