Raven's Progressive Matrices (often referred to simply as Raven's Matrices) or RPM is a nonverbal group test typically used in educational settings. It is usually a 60-item test used in measuring abstract reasoning and regarded as a non-verbal estimate of fluid intelligence. It is the most common and popular test

administered to groups ranging from 5-year-olds to the elderly.

Raven's Progressive Matrices - Wikipedia

If you know exactly which file you'd like to download or you want a file different from any listed below you can go directly to the Download Page to get it.

Differential Equations - Review : Matrices & Vectors

Definition. A matrix is a rectangular array of numbers or other mathematical objects for which operations such as addition and multiplication are defined. Most commonly, a matrix over a field F is a rectangular array of scalars each of which is a member of F . Most of this article focuses on real and complex matrices, that is, matrices whose elements are real numbers or complex numbers ...
