This is a list of sources that each list metalloids: elements classified as metalloids. The sources are listed in chronological order. Lists of metalloids differ since there is no rigorous definition of metalloid (or its occasional alias, 'semi-metal').

Lists of metalloids - Wikipedia

Water is the chemical substance with chemical formula H₂O; one molecule of water has two hydrogen atoms covalently bonded to a single oxygen atom. Water is a tasteless, odorless liquid at ambient temperature and pressure, and appears colorless in small quantities, although it has its own intrinsic very light blue hue. Ice also appears colorless, and water vapor is essentially invisible as a gas.

Properties of water - Wikipedia

Welcome new students! Have you signed up for the summer registration events? If you want to register for you classes early, be sure to select one of the options. Orientation starts on Friday, August 17 for new students.
