Lectures on Classical Differential Geometry: Second

The Table of Contents lists the main sections of the Mathematics Subject Classification. Under each heading may be found some links to electronic journals, preprints, Web sites and pages, databases and other pertinent material.

Mathematics by Classifications - mathontheweb.org

This note covers the following topics: Baby Differential Geometry, Curvature, Gravitation and the Einstein Equation, Black Holes and Gravitational Radiation, Lie Derivatives and Isometries.

Euclidean geometry is a mathematical system attributed to Alexandrian Greek mathematician Euclid, which he described in his textbook on geometry: the Elements. Euclid's method consists in assuming a small set of intuitively appealing axioms, and deducing many other propositions from these. Although many of Euclid's results had been stated by earlier mathematicians, Euclid was the first to show ...

Euclidean geometry - Wikipedia

This book introduces the tools of modern differential geometry--exterior calculus, manifolds, vector bundles, connections--and covers both classical surface theory, the modern theory of connections, and curvature.

Question on Iterated Limits in Relativity. Authors: Valeriy Dvoeglazov Comments: 3 Pages. Two iterated limits are not equal each other, in general. Thus, we present an example when the massless limit of the function of $E, \text{vec } p, m$ does not exist in some calculations within quantum field theory.
