Oxidative stress is a normal phenomenon in the body. Under normal conditions, the physiologically important intracellular levels of reactive oxygen species (ROS) are maintained at low levels by various enzyme systems participating in the in vivo redox homeostasis. Therefore, oxidative stress can also be viewed as an imbalance between the prooxidants and antioxidants in the body.

The Allam cycle is a novel CO<sub>2</sub>, oxy-fuel power cycle that utilizes hydrocarbon fuels while inherently capturing approximately 100% of atmospheric emissions, including nearly all CO<sub>2</sub> emissions at a cost of electricity that is highly competitive with the best available energy production systems that do not employ CO<sub>2</sub> capture. The proprietary system achieves these results through a semi-closed ...

Fallout is a series of post-apocalyptic role-playing video games. It was created by Interplay Entertainment. The series is set during the 22nd and 23rd centuries, and its atompunk retrofuturistic setting and artwork are influenced by the post-war culture of 1950s America, with its combination of hope for the promises of technology and the lurking fear of nuclear annihilation.

Acculturation is the process of social, psychological, and cultural change that stems from blending between cultures. The effects of acculturation can be seen at multiple levels in both the original (native) and newly adopted (host) cultures. Historically speaking, acculturation is a direct change of one's culture through dominance over another's culture through either military or political ...
