The economic ideas that would become the basis for Keynesian economics were set forward in Keynes's main work, *The General Theory of Employment, Interest and Money* (1936). Comprising nearly 400 pages, it was written when the world was in the throes of the Great Depression, during which unemployment rose to 25% in the United States and as high as 33% in some countries.

In economics, inflation is a sustained increase in price level of goods and services in an economy over a period of time. When the price level rises, each unit of currency buys fewer goods and services; consequently, inflation reflects a reduction in the purchasing power per unit of money – a loss of real value in the medium of exchange and unit of account within the economy.
