A T-group or training group (sometimes also referred to as sensitivity-training group, human relations training group or encounter group) is a form of group training where participants themselves (typically, between eight and 15 people) learn about themselves (and about small group processes in general) through their interaction with each other. They use feedback, problem solving, and role play ...

Definition of Terms. Results from a test run (such as in these statistical reports and graphs generated by LoadRunner) are the values obtained from measuring the impact of a specific set of run conditions.. Conclusions (such as these) are subjective decisions (a proposition or claim) reached after (hopefully) thoughtful consideration of the facts drawn from evidence provided.
