A software requirements specification (SRS) is a description of a software system to be developed. It is modeled after business requirements specification, also known as a stakeholder requirements specification (StRS). [citation needed] The software requirements specification lays out functional and non-functional requirements, and it may include a set of use cases that describe user ...

Is This for Me? Yes, if you want to build the right product. Your title is probably systems engineer, software engineer, business analyst, systems analyst, project leader, requirements engineer, product or program manager or similar. Or if you are a user or software customer and want to ensure the requirements process delivers what you need.

### **Requirements Co-Engineering**

A system is a regularly interacting or interdependent group of units forming an integrated whole. Every system is delineated by its spatial and temporal boundaries, surrounded and influenced by its environment, described by its structure and purpose and expressed in its functioning.

Electrical protection and lightning protection I have a query on earthing system design. One designer has submitted me an earthing plan which interconnects the earth electrodes meant for equipment earthing and those for lightning protection purposes. By combining the earth electrodes he achieves overall earth resistance below one ohm required by IS 3043 (Indian standard).
